## Technical Data Sheet – Boron-20 % ( Di-Sodium Octa Borate Tetra hydrate)

Boron is an essential plant nutrient and boron compounds such as borax and boric acid are used as fertilizers in agriculture, although it's only required in small amounts, with excess being toxic. Boron compounds play a strengthening role in the cell walls of all plants.

Sr. No	Specifications	Result	Unit
01	Boron (as B)	20.0	% w/w
02	Matter insoluble	1.0	w/w
03	Lead (as Pb)	0.003	% w/w
04	Cadmium (as Cd)	0.0025	% w/w
05	Arsenic (as As)	0.01	% w/w

### Application

Boron is an essential plant nutrient and boron compounds such as borax and boric acid are used as fertilizers
