## Technical Data Sheet – Ferric Sulphate

Ferric Sulphate, is the chemical compound with the formula  $Fe_2(SO_4)_3$ . Usually yellow, it is a salt and soluble in water.

SR No	Particulars	Standard	Result
01	Content of Iron(Fe)	19% to 21%	19.5%
02	Content of Ferric Sulphate	68% to 72%	71%
03	Solubility of Ferric Sulphate	Slow Soluble in water	Slow soluble in water
04	Appearance	Yellow to White powder	Yellow to White powder

### Application:

Solutions are used in dyeing as a mordant, and as a coagulant for industrial wastes. It is also used in pigments, and in pickling baths for aluminum and steel.
